TECHNIDATA joins Cercle Idéo, which unites partner companies of MC2, the arts center of Grenoble, France.

Montbonnot, June 28, 2016

TECHNIDATA, the software supplier for clinical laboratories and biorepositories, renews its support for the arts center of Grenoble, France, and joins Cercle Idéo, the new partner companies club.

Participating in local community life and promoting access to art and culture within the company

For 8 years, TECHNIDATA has been a partner of the MC2, the Grenoble arts center with a national and international reach. On March 30 of this year, TECHNIDATA joined Cercle Idéo, a new organization bringing together sponsor companies.

"I wanted to bring something more than just a professional mindset into the company and culture seemed an excellent medium to share with our associates", explains François Falco, President of TECHNIDATA. *"Through our partnership with MC2, our associates access to the best shows and performances. Through these tickets they have the opportunity to see shows that they wouldn't necessarily have gone to watch otherwise."*

A longstanding establishment in Isère, a strong international presence

"The commitment of partner companies to promote access to art and culture to their associates and at times their clients, contributes not only to the outreach of the MC2, but also to the entire Grenoble area of Isère", comments Jean-Paul Angot, Director of the MC2

Although TECHNIDATA corporate headquarters are based in Montbonnot, near Grenoble, the company is also present in Germany, Benelux, France and the United Kingdom through its subsidiaries, and in Canada and the Philippines, through its regional headquarters in Montreal and Manila respectively, for the North America and Asia-Pacific zones.

The company also relies on a network of partners who distribute its solutions throughout the rest of the world. Today, TECHNIDATA software solutions are commercialized in 25 countries.

About MC2
www.mc2grenoble.fr

The Grenoble community arts center, inaugurated by André Malraux in 1968, is an important artistic melting pot. Under the direction of Jean-Paul Angot, MC2 is venue for artistic creation, production and distribution on a national and international scale, focusing particularly on the contemporary. It welcomes all sorts of live art, both in production and distribution, by providing open spaces to artists and other cultural activities. The only such center in France to have 4 halls and practice studios, 3 theaters of which be used for any type of show from the most traditional to the most innovative, MC2 also has an exceptional auditorium that can welcome the greatest soloists and orchestras. The national choreography center of Grenoble is also located within its premises.
