

# TECHNIDATA IS RECRUITING

## A Software Development Engineer (C++)

Permanent full-time position – Manila, Philippines

### WHO ARE WE?

TECHNIDATA is a subsidiary of the TSS CSI group, a leading vertical software publisher in Europe and worldwide with an annual revenue of more than 2 billion €. TECHNIDATA is a certified ISO 9001 and 13485 software publisher in the field of IT solution for medical laboratories.

With a background of 30 years of experience and knowledge in the organization and management of Laboratory Information Systems, TECHNIDATA provides the design, distribution, installation, and maintenance of the solutions for more than 650 customers worldwide.

Our 150 employees across 6 subsidiaries in Europe, America and Asia, work together around common corporate values that promote quality, respect and passion.

We are conducting a transformation project in which the development of our employees and the satisfaction of our customers are at the center of our concerns and our growth dynamic.

In order to support our development in Manila and internationally, we are recruiting a **Software Development Engineer (C++)**.

### WHAT YOUR DAILY ROUTINE WILL BE?

- Report to a Project Manager and belong to a local and international R&D team.
- Act throughout the life cycle of software development: research, analysis, design, coding, tests, and defect corrects in compliance with the quality and budget commitments of the group.
- Implement programming in object-oriented language with respect to clean code principles and propose enhancements to the relational database schema.
- Define software solutions and evaluate the software development costs.
- Bring out creative problem-solving ideas.
- Collaborate effectively with local and offshore colleagues.

## WHO ARE YOU?

- Candidate must possess at least Bachelor's/College Degree in Computer Science, Engineering (Computer/Telecommunications), Mathematics, Information Technology or equivalent.
- Expertise in C++ and OOP, with respect to clean code principles
- Optional exposures to any of the following is a plus:
  - SQL programming, specific to Oracle and MS SQL Server
  - Python scripting and MFC library
  - C++/CLI or C#.Net
  - MS Visual Studio, MS Teams, MS CRM, Azure DevOps
- Minimum 2 years work experience in above technical skill requirements
- Highly independent requiring minimal supervision and direction
- With good oral and written communication skills in both technical and non-technical context

## WHAT WILL BE YOUR FUTURE BENEFITS AS AN EMPLOYEE?

**Hybrid work at home and at office** arrangement

An attractive **fixed and variable** remuneration package that values performance

Comprehensive **benefits package**

**An integration program** with training adapted to your future position

Be a part of a **talented and collaborative team** with support from **friendly colleagues**

Work-life balance

**By joining TECHNIDATA, you will evolve in an international Group on a human scale, while benefiting of a pleasant working environment. Without further delay, apply and join the TECHNIDATA adventure!**
